

## IMPORTANT NOTICE

As highlighted by the Food Standard Agency we would like to draw your attention to the 14 most common allergenic ingredients contained in food.

Some of these ingredients may be included in foods served to your child at snack time.

Food allergens can be life threatening. If your child has a food allergy the only way you can manage it is to avoid the foods that make you ill.

Please speak to either of the Preschool Managers if your child has any allergies or food intolerances.
